RE: Recommendation Letter for Steve Crisci

To Whom It May Concern:

Over a period of several months from 2007-08, Steve Crisci and I worked together on our contact database system at the Virginia Economic Development Partnership.

Steve was responsible for updating the software version that the database was written on. As I am familiar with from other companies, this can be a lengthy and disruptive process. However, Steve apparently handled the transition very well as I found few problems and the others in my organization were relatively copacetic. For the number of times where there was a bug or request for a change, Steve was quick to respond. Furthermore, I found him to be knowledgeable about the software because the corrections/changes were made immediately.

It was a pleasure working with Steve and I wish him great success!

Respectfully,

A handwritten signature in cursive script, reading "Mario L. Camardella".
