To Whom It May Concern:

I had the pleasure of working with Steve Crisci on a recent development effort within our organization. Steve was hired on a contract basis as a .NET developer for a project which included extremely aggressive time lines.

Steve was able to quickly gain a good understanding of documented requirements/specifications, thus providing an immediate value add. His insight into our business processes and complex business rules, along with his knowledge of the technology of choice, was invaluable to the solution development process.

I am appreciative of Steve's work and would highly recommend him for a position with your organization.

Respectfully,
